SUMMARY

Full Stack Developer who replaces manual, error-prone workflows with systems people actually use. Information Systems student at UNPAM (GPA 3.70/4.0, Semester 1-6) and Full Stack Engineer at PT Indotech Digital, with 20+ pull requests merged to a live Laravel platform; also a Data Analyst (OJT) at APIKpreneur, Bakti Pemuda Foundation. Final year project: a Laravel system replacing a casting agency's WhatsApp-and-spreadsheet workflow. Earlier: a Golang marketplace API (90.91/100) and a Vue.js e-commerce catalog (87.79/100).

TECHNICAL SKILLS

Languages & Data: PHP, JavaScript, Golang, SQL, MySQL, HTML5, CSS3
Frameworks: Laravel, Vue.js 2, Gin (Golang), Bootstrap
Architecture & Auth: Clean Architecture (Handler-Service-Repository), Eloquent ORM, REST API, JWT, RBAC
Data & Automation: Google Apps Script, Data Analysis, Dashboard Reporting
Tools & DevOps: Git & PR review, GitHub, GitHub Actions, GitLab CI/CD, Postman, WSL, Figma
Networking: Cisco IOS, OSPFv2, ACLs, NAT, network security hardening (CCNA ENSA)
AI & Cloud: AI-assisted development workflow, Prompt Engineering, Azure OpenAI, Huawei Cloud (HCIA)

PROFESSIONAL EXPERIENCE

Data Analyst (OJT) - APIKpreneur / Bakti Pemuda Foundation *Aug 2026 - Present | Jakarta, Hybrid*

- Placed with Gatra Data (data-analytics partner) under a scholarship-funded OJT program; built an automated donor segmentation engine in Google Apps Script for a 16,000+ row dataset, using hierarchical RFM-style logic resolved directly with stakeholders.
- Designed a self-service dashboard - favorite-program ranking and cumulative month-over-month segment growth - for non-technical teammates.
- Automated the full pipeline with a daily time-driven trigger, including debugging a getUi() execution-context error.

Full Stack Engineer - PT Indotech Digital Group *Jun 2026 - Present | Jakarta, Hybrid*

- Ship features to Nobel Akademi, a live Learning Management System - 20+ pull requests merged to production through a dev to staging to main review flow.
- Building the live-streaming studio module for NobiPlay: role-based CMS, stream scheduling, and automated channel setup, backed by a 442-test suite.
- Built the Bootcamp module end-to-end in Laravel 11 (6-table data model, backend, admin CMS, public pages) and the Webinar module (registration, Mailable confirmations); eager-loaded Eloquent relations to avoid N+1 queries.
- Traced a production defect to its root cause (a corrupted vendor asset silently halting JavaScript) and hardened the page so one failing library cannot break unrelated features.

Backend Developer Intern - Evermos x Rakamin Academy *Dec 2025 | Remote*

- Built a Marketplace REST API (Golang/Gin, MySQL, JWT) with Clean Architecture across 7 modules, including RBAC, multi-image upload, pagination, and atomic DB transactions. Score: 90.91/100. View Certificate

Frontend Developer Intern - Core Initiative x Rakamin Academy *Oct - Nov 2025 | Remote*

- Built an E-Commerce Catalog (Vue.js 2) on live REST API data with 3 dynamic UI themes, a pixel-perfect Figma implementation, and CI/CD deployment. Score: 87.79/100. View Certificate

Data Management Intern - Lembaga Kemahasiswaan & Alumni UNPAM *Nov 2024 - Jul 2025 | On-site*

- Managed 500+ student and alumni records, automated data workflows with JavaScript, and built a digital archive of 1,000+ files. Predikat: Sangat Baik. View Certificate

SELECTED PROJECTS

SIM Casting - PT JBTB Casting Creative Group (Final Year Project) *Sep 2026 - Present*

- Project lead and lead developer (team of 3): Laravel 13 system with five roles, logged multi-round fee negotiation, payslips, digital contracts, and 769 automated tests on SQLite and MySQL.

Re:Daily Coffee website and Notes blog *Oct 2026*

- Built and deployed two live static sites on GitHub Pages with custom Node generators, covering structured data and sitemaps: re-daily.my.id (café site) and notes.fakrul.dev (blog).

EDUCATION

Bachelor of Information Systems - Universitas Pamulang *Sep 2023 - Oct 2027 (Expected)*
GPA 3.70 / 4.00 (Semester 1-6) - Tangerang Selatan, Banten
Published: "Penerapan Metode SAW Penerima BLT Berbasis Web pada Kantor Desa Waru Jaya" - Inomatec Journal, Jan 2026

CERTIFICATIONS

- CCNA: Enterprise Networking, Security & Automation - Cisco Networking Academy - Sep 2026
- Junior Web Developer - BNSP (BPPTIK Kominfo, Digitalent Scholarship) - Aug 2023 - Aug 2026
- Linear Models in Machine Learning (91 hrs) - Yandex / Komdigi - Ranked #5 of 926 in competition - 2025
- HCIA Cloud Service - Huawei / Komdigi - 2025
- Project Management (Google) and Prompt Engineering with Azure OpenAI (Microsoft) - Komdigi, 2025
- UKBI Madya (Score 549) - Badan Bahasa, Kemdikbud - valid to Sep 2027 - 2024

LEADERSHIP

President - Forum Studi Jurnalis *Oct 2021 - Nov 2022*

- Led a 300+ member student journalism organization and coordinated 15+ events; recognized as Best Chapter President.

Languages: Indonesian (Native, UKBI Madya), English (Conversational). Open to full-time roles, local (Jakarta area) or remote/international.
